

Ethics Grand Rounds

Can the placenta and breastmilk be used for offspring drug delivery? Should they?

Teri Hernandez, PhD, RN, FAAN

Professor and Associate Dean of Research & Scholarship
CU College of Nursing and Department of Medicine,
Division of Endocrinology, Metabolism, and Diabetes.
Pediatric Nurse Scientist, Children's Hospital Colorado

Michael Zaretsky, MD

Professor, CU School of Medicine
OB-GYN-Maternal Fetal Medicine
Director of Research, Colorado Fetal Care Center
Children's Hospital Colorado

Thursday, May 16th from Noon-1:00pm (MT)

[RSVP for this ZOOM Conference](#)

Learning Objectives:

- Describe emerging challenges and opportunities related to targeted drug delivery for fetal health.
- Explain existing regulations governing research with people who are pregnant or breastfeeding.
- Analyze the risks and benefits when a study drug passes to a breast-fed infant.
- Employ 2 practical strategies that can be used to manage ethical issues in this complex setting.
